What is PISCES PROGRAM ?

Washington, DC - June 10, 2014

« Increasing the ability of our partners to address terrorist threats within their borders and regions is crucial. Building partner capacity in law enforcement, countering terrorism finance, and travel interdiction programs is at the heart of our civilian counterterrorism efforts.

The Counterterrorist Finance program supports the placement of advisors such as Department of Justice Resident Legal Advisors (RLAs) and Department of Homeland Security mentors in key partner nations to advise host nation authorities and build the capacity of priority countries to detect, disrupt, and dismantle terrorist financing networks. Funds are targeted specifically at those countries whose financial systems are considered most vulnerable to exploitation by terrorist groups and their financiers.

« Enhancing border security through terrorist travel interdiction is another priority. The Terrorist Interdiction Program provides 22 partner countries with the Personal Identification Secure Comparison and Evaluation System known as PISCES to identify, disrupt, and deter terrorist travel ».

In 2013, approximately 300,000 passengers per day were processed through PISCES systems around the world (a record for the program). A majority of Ports of Entry are now using upgraded biometric PISCES systems to process travelers for the first time. The increased use of biometrics has enabled PISCES partner countries to improve exponentially their ability to detect terrorists traveling under assumed identities with sophisticated false documentation ».
